Contents Volume 67

1 Behavioral influences on weight judgments in multiattribute decision making (*Invited Review*)
M. Weber and K. Borcherding
13 Yacht velocity prediction using mathematical programming
A.B. Philpott, R.M. Sullivan and P.S. Jackson
25 Algebraic Languages for Mathematical Programming
C.A.C. Kuip
52 A heuristic for finding embedded network structure in mathematical programmes
B.M. Baker and P.J. Maye
64 An iterative procedure for reducing problem size in large scale AHP problems
K.H. Lim and S.R. Swenseth
75 Multi-parametric analysis of the maximum tolerance in a linear programming problem
H.-F. Wang and C.-S. Huang
88 New LP based heuristics for the classification problem
P.L. Abad and W.J. Banks
101 Linear goal programming in estimation of classification probability
K.F. Lam, E.U. Choo and W.C. Wedley
111 The limits of Combat I: Possibility zones, resource mobilization, and attrition processes
A.E.R. Woodcock
126 A modified simplex approach for solving bilevel linear programming problems
H. Önal
136 Dual of the sum of a linear and linear fractional program
S.S. Chadha

141 Models for multi-plant coordination (*Invited Review*)
R. Bhatnagar, P. Chandra and S.K. Goyal
161 Stochastic dynamic programming to support sow replacement decisions
R.B.M. Huirne, A.A. Dijkhuizen, P. van Beek and T.H.B. Hendriks
172 Experiments with dynamic programming algorithms for nonseparable problems
A. Domingo and M. Sniedovich
188 Serial and parallel value iteration algorithms for discounted Markov decision processes
T.W. Archibald, K.I.M. McKinnon and L.C. Thomas
204 The project scheduling polyhedron: Dimension, facets and lifting theorems
R. Alvarez-Valdés Olaguíbel and J.M. Tamarit Goerlich
221 Risk taking in stochastic PERT networks
H. Soroush
242 Optimal design of a multiservice system: The line-penalty problem
B. Viscolani
248 Determination of the best main serial chain in nonserial dynamic programming networks
C.Y. Lee and A.O. Esogbue
259 A stochastic dominance comparison of truncated normal distributions
W.E. Stein, R.C. Pfaffenberger and P.J. Mizzi
267 A statistically optimal estimator of semivariance
N.H. Josephy and A.D. Aczel
272 Least absolute deviation estimation of stationary time series models
W.T.M. Dunsmuir and B.A. Murtagh
278 First and second order characterizations of pseudolinear functions
S. Komlósi
287 Directional bias of the l_p-norm
J. Brimberg and R.F. Love
295 OR Software
H. Thiriez (ed.)

0377-2217/93/$06.00 © 1993 – Elsevier Science Publishers B.V. All rights reserved

297 New concepts for production planning and control (*Invited Review*)
G. Zäpfel and H. Missbauer
321 Planning laboratory staffing with a queueing model
M. Riaz Khan and B.B. Callahan
332 A Monte Carlo comparison of two production frontier estimation methods: Corrected ordinary least squares and data envelopment analysis
R.D. Banker, V.M. Gadh and W.L. Gorr
344 On-line production control using the EVPI approach
Z. Sinuany-Stern, D. Golenko-Ginzburg and B. Keren
358 Establishment of economic production rate, production batch size, and production sequence in manufacturing systems with flexible routing
P.J. Egbelu
373 Approximate decomposition for closed queueing network models of FMSs with a block-and-wait and state-dependent routing mechanism
L. Zhuang and K.S. Hindi
387 An integrated approach to the part selection and machine loading problem in a class of flexible manufacturing systems
M. Liang and S.P. Dutta
405 Design of cellular manufacturing systems based on asymptotic forms of a Boolean matrix
V. Venugopal and T.T. Narendran
418 File allocation involving worst case response times and link capacities: Model and solution procedure
I. Murthy and D. Ghosh
428 Design of private backbone networks – I: time varying traffic
K. Chari and A. Dutta
443 Design of private backbone networks – II: time varying grouped traffic
K. Chari and A. Dutta
455 Contents Volume 67
